Re: BTC Customers with Irrigation Meters

You have received this letter because Borden Tri-County Water (BTC) has you listed as a customer with an irrigation system. As you probably know, irrigation systems are required by BTC's "Cross Connection Control Program" to have an approved "back-flow" device to ensure that contaminated water does not enter our water distribution system. These devices require annual inspection by a certified "Cross Connection Control Device Inspector" as mandated by Indiana's CCC Regulation Code 3271AC 8-10.

This letter is to inform you that BTC Water is requesting your compliance with this program by having your device(s) tested and that a copy of the inspection report be sent to the BTC office within 90 days of the receipt of this letter. Disconnection of service may be the result if an inspection test report has not been received at the BTC Water office for the current calendar year.

A list of certified Cross Connection -Backflow Device Inspectors for Clark, Floyd, Harrison & Washington Counties is available at the BTC office. A complete pdf list of Indiana certified inspectors is available through the Indiana Department of Environmental Management:
https://www.in.gov/idem/cleanwater/files/dw_backflow_operations_list.pdf

Copies of Borden Tri-County Regional Water District's "Cross-Connection Control" (CCC) program, and Indiana's CCC regulation code (3271AC 8-10) is available at the Borden Tri-County Regional Water District's office. Questions concerning your reporting requirements may be directed to Manager, Daryl Naville at (812) 967-2226.

Sincerely,
Daryl Naville, Manager
Borden Tri-County Water District

Homeowners/business owners are responsible for providing BTC Water with a copy of their testing results showing compliance. These results must be provided to the office no later than July 31, of this year to avoid potential disconnection of service until your account is brought into compliance.
